

M&B Commercial Ltd

ENVIRONMENTAL POLICY STATEMENT

M&B Commercial Limited will control its activities in such a manner to avoid causing unnecessary or unacceptable damage to the environment as far as is practicable.

To achieve this goal the Company will:

1. Comply fully with all relevant environmental legislation, codes of practice, guidance and industry best practice.
2. Develop environmental awareness and individual responsibility at all levels throughout the organisation.
3. Encourage full and effective consultation on environmental matters with our employees.
4. Provide appropriate training on environmental issues where a need for such training is identified.
5. Prevent nuisance to the local community and to avoid damage to the environment.
6. Reclaim and recycle materials and substances used in the commercial vehicle industry wherever possible so to ensure the conservation of raw materials such as engine oil, oil filters, tyres and obsolete batteries.
7. Dispose of any waste arising from our business activities in the most environmentally acceptable way possible.
8. Service and maintain our customer's vehicles in such a way that they operate at maximum efficiency and give optimum fuel consumption.
9. Routinely monitor our environmental performance to ensure we achieve these objectives and effect further improvements wherever the audit may identify.
